

FINANCIAL MODELLING AND ANALYTICS

PROVIDING INSIGHT & CLARITY TO DRIVE BUSINESS PERFORMANCE

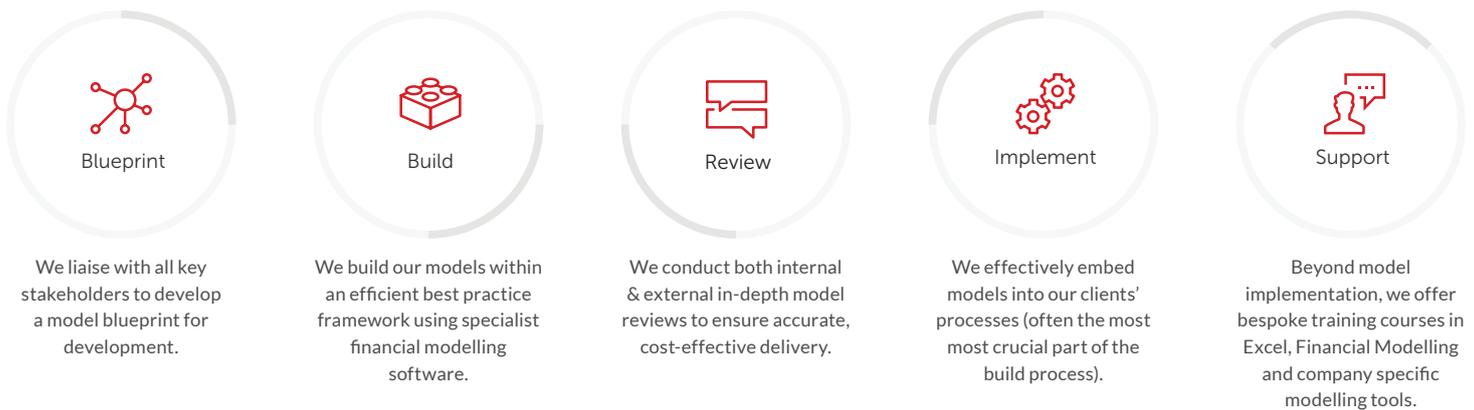

CONSISTENT. TRANSPARENT. ROBUST.

Forecast is a specialist modelling consultancy providing clients with insightful tools to enhance business performance. We primarily build tools in Excel, often with direct data feeds from external sources providing an efficient link to our clients' business information. Forecast has offices in Europe and Australia with the ability to work on projects internationally.

WHAT WE DO

We offer an independent, fresh approach. Our modelling tools provide the ability to see the impact of key business drivers under different future scenarios. And everything we do with you is focused on a single outcome: robust analysis enabling confident decision-making.

When Forecast engages with clients, we undertake a 5 stage process:

- Data and Analytics
- Budgeting and Forecasting
- Pricing and Campaign Effectiveness
- Demand and Capacity Planning
- Corporate Planning
- Scenario Analysis and Stress Testing
- Strategic Analysis and Decision Support
- Investment and Funding Analysis
- Training

MODELLING SPECIALISTS

Forecast's modelling consultants have a wealth of experience enabling the development of robust decision support tools and providing insights into the key drivers of your business.

PARTNER WITH FORECAST

With offices in Australia and Europe we're ready to work with you across the world – wherever you need us.

And be assured our first meeting won't be the last. We work closely with our clients so you'll see us actively involved at every step of the project.
